

TECHNOLOGY CENTER

Founded in January of 2003, Inventrek is a high-tech incubator led by seasoned professionals who have an intimate understanding of the challenges businesses encounter today. They help new technology-driven companies realize their potential in developing technology-based initiatives by providing both physical core services (receptionists, copiers, postage machines, conference rooms and T1 lines) and critical professional/technical ser-vices patterned after the Purdue Gateways Program. Inventrek hosts small, high-tech, joint ventures (less than 5,000 sq. ft.) between existing high-tech companies and their suppliers and customers. They remain the best option for companies requiring a results-oriented technology partner dedicated to helping your business realize its full potential.

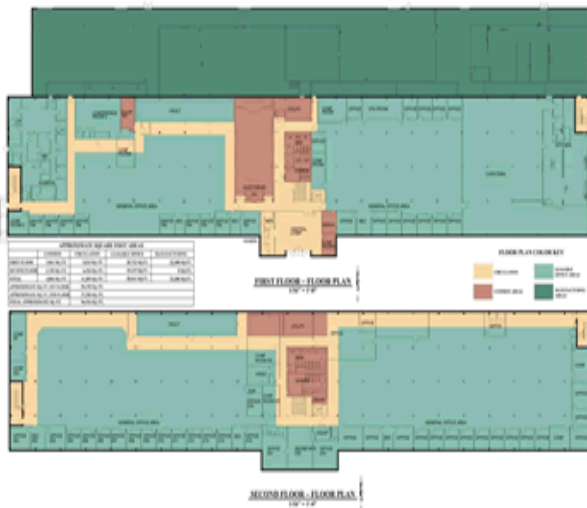

Benefits

Inventrek provides a unique opportunity for emerging technology-based businesses to participate in a stimulating work environment designed to realize your full potential. This happens by helping you accelerate your business-launch timetable by:

- » Directing the preparation of a sound business
- » Gathering intelligence on key industries, competitors and markets
- » Recruiting experienced mentors from industry to work directly with you
- » Brokering strategic alliances with other start-ups or established firms
- » Advising you on competitive strategies, fostering sustainable competitive advantages
- » Identifying useful trial-sell, beta test, and test market opportunities
- » Consulting on key matters of organizational development in hyper-growth environments
- » Positioning you to interact with important investors and venture capitalists
- » Identifying experienced business leaders to complement world-class technical specialists in the creation of well-balanced top management teams
